For which purpose are data collected and processed?

The data collected during the International Civic and Citizenship Education Study (ICCS 2022) will be used exclusively for scientific purposes. ICCS is an educational research project sponsored by the International Association for the Evaluation of Educational Achievement (IEA).

Which information is requested?

The principals (if a principal is not available, other equally qualified personnel) of participating schools are invited to complete the ICCS 2022 School Questionnaire in order to provide the study with information about the principals' perceptions of teacher participation in school governance, school environment, the local community education at school, and student opportunities to participate in community activities.

- **Participation in ICCS is mandatory for schools.**
- **Consent for collecting and processing the data is declared by filling in and returning the completed questionnaire.**
- Contact details of the person in charge of queries regarding data protection issues:

*Andreas Polydorou
Centre of Educational Research and Evaluation, Pedagogical Institute
40 Macedonias Avenue, 2238, Latsia
Tel.: 22402455
Fax: 22560118
Email: polydorou.a@cyearn.pi.ac.cy*

What kind of data are collected?

Data from answers to the questions from every completed ICCS School Questionnaire are collected and stored. This is in the form of numbers representing selections (for example, a multiple choice question), or values (for example, a figure for number of students in the target grade).

This information cannot, in and of itself, be used to identify individual respondents by name, however an ID is recorded to uniquely identify each school. The relationship between this ID and the school name, or national registration number, is known to the school coordinator, the national research center conducting the study and the IEA, but is not shared with any other parties.

Where, how and for how long are data from ICCS stored?

ICCS data are stored securely and cannot be accessed by any external persons or systems. Moreover, any employees at IEA or the International Study Center at ACER who access the data for processing have been suitably briefed on what constitutes an acceptable treatment of data and have signed a confidentiality agreement.

The data are stored as follows:

Response data are stored indefinitely so that they remain available for analyses. These responses eventually result in a database that allows researchers to compare education systems worldwide (see Public accessibility below).

Data are processed centrally at the IEA in Hamburg, Germany. All data arriving for data processing are submitted without names – only the school ID numbers.

With whom and how are data from ICCS shared?

Response data are sent from national centers to the IEA, via the web-based collaborative platform Share Point, in a pseudonymous form, that is: processed in such a manner that the personal data can no longer be attributed to a specific data subject without the use of additional information (any such additional information being kept separately and subject to technical and organizational measures to ensure that the personal data are not attributed to an identified or identifiable natural person).

ICCS is directed by the International Study Center (ISC) based at ACER, Melbourne, Australia, and most of the data analyses occur there. Response data are required for the analysis but are sent to the ISC, via the web-based collaborative platform Share Point, in a pseudonymous form. ISC employees who access the data for analyses have signed a confidentiality agreement. The transfer of the data to Melbourne, Australia as a third country, is safeguarded by appropriate and suitable measures like a specific Data Processing Agreement and European Standard Contractual Clauses.

The data are also shared back, again over via the web-based collaborative platform Share Point, with the national research centers running ICCS in your country.

Related data

Along with the principals, teachers and students are also asked to complete a questionnaire. Information coming from these sources is linked to that from principals in the final international research database (IDB).

Public accessibility

The final international research database will be accessible to the public from the following sites:
<https://www.iea.nl/data> (Hamburg, Germany)

All data in the database are pseudonymous, and cannot be linked to individuals.

Automated decision-making and profiling

No automated decision-making, including profiling, referred to in Article 22 GDPR is conducted.

Rights of Data Subjects

Data Subjects are entitled to the rights set out in Articles 15-20 GDPR.

Data Subjects have the right to lodge a complaint with a supervisory authority.
